## ◆ WORK EXPERIENCE

### **Freelance Developer • 2022–Present**

- Built interactive web experiences using React, GSAP, Three.js
- Developed data analysis tools with Python and pandas
- Created ML models for computer vision and data classification
- Implemented REST APIs using Node.js and Express.js
- Deployed applications with Docker and managed databases
- Achieved 95%+ uptime on production systems

### **Junior Developer • 2021–2022**

- Built cross-platform mobile apps with React Native and Expo
- Collaborated on UX/UI design with Figma
- Implemented web best practices and responsive design

## ◆ EDUCATION

### **Self-Directed Learning**

Software Engineering, Data Science & Machine Learning  
2020–Present

## ◆ GENERAL SKILLS

**Frontend:** React, React Native, HTML5, CSS3, Tailwind

**Backend:** Node.js, Express.js, FastAPI, REST API

**Data/ML:** Python, Data Science, ML/AI, Computer Vision

**Databases:** MongoDB, SQL, SQLite, Firebase

**Tools:** Git, Docker, Postman, Figma, Expo

**Languages:** JavaScript, Python, C++, C#

## ◆ PERSONAL PROJECTS

### **Nebula Studio**

Brand platform with motion-driven landing pages and immersive UI

### **Orbit Commerce**

E-commerce platform with analytics and conversion tracking

### **Lumen Labs**

Product showcase with storytelling UI and WebGL visualizations

## ◆ LANGUAGES

English (Fluent) • Urdu (Native)

## ◆ INTERESTS

Data Science • Machine Learning • Web Development • Open Source

• Creative Coding • UI/UX Design
